

TOGAF 8 Architecture training

Course description (code: ARCH-TOGAF8E)

When you are an IT Architect who considers or plans to exploit the architecture framework TOGAF in Enterprise Architecture Projects, this is the course that fits your interest. In a comprehensive way the course covers the different features of TOGAF: its methodology (Architecture Development Method), key concepts such as the Enterprise Continuum and the Resource Base. The TOGAF 8 training provides the knowledge you need to use TOGAF effectively in your IT architecture work. The course is also suited for architects pursuing the certification 'TOGAF Certified Practitioner'.

The TOGAF Framework is a framework that is developed by the Open Group. It coexists with other frameworks such as IAF. During the 4 day course all aspects of this framework are discussed. Also the differences with other frameworks are pointed out.

Objectives of this training

- Getting the knowledge to start with TOGAF 8 in daily architectural projects
- Preparing for TOGAF 8 Practitioner certification

Target audience

This course is fit for architects who need to get acquainted with the TOGAF framework and/or who wish to obtain the TOGAF 8 Practitioner certification. A prior knowledge of IT Architecture is highly recommended.

Content

The subjects covered are for instance:

- TOGAF8 Architecture Development Method (ADM) - Process
- TOGAF8 Architecture Development Method (ADM) - Information Sets
- TOGAF Foundation Architecture
- The Enterprise Continuum
- TOGAF and other architectures / frameworks
- Architecture Governance

Certification procedure

After ending the course the participants may be submitted for certification to the Open Group. The trainers will recommend participants to the Open Group upon sufficient evaluation based on attitude and the results of the exam at the end of the course. After certification the participants will be listed as TOGAF 8 certified individual in the public register on the Open Group website.

During the course self study is required in the evening as preparation for the exam.

Coach qualifications

The trainers who provide TOGAF 8 training for Capgemini Academy are certified 'TOGAF 8 practitioners' as well as experienced architects within the Capgemini Architect Community. They also provide other architecture courses for Capgemini Academy.

Material

Standard course material is obtained from The Open Group.

Included in the investment

In the price of the course is included:

- Course material,
- Registration fee for the students,
- Initial certification fee for the Open Group.

Follow-up course

The training Business Case for Architects is advised as follow-up course. During this course the participants learn how to emphasize the financial beneficial consequences of architectural choices. During the course you also learn how to formulate a business case for architectural work.
